Appl. No. 10/003,996 Amendment Dated March 3, 2008 Reply to Office Action of October 4, 2007

In the Claims:

Claims 1-35 (Canceled).

Claim 36 (Previously presented). A surgical procedure to be conducted on a patient, said surgical procedure comprising the steps of removing tissue from a first location in the patient's body, separating one or more components from at least a portion of the removed tissue, thereafter packing the removed tissue into a desired shape, and thereafter implanting the packed tissue at a second location in the patient's body, wherein the removed tissue includes blood and other body tissue.

Claim 37 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step of separating one or more components from the removed tissue includes centrifuging at least a portion of the removed tissue.

Claim 38 (Previously presented). A surgical procedure as set forth in claim 36 further including the step of adding a substance to the removed tissue after separating one or more components from the removed tissue and prior to implanting the packed tissue at a second location in the patient's body.

Claim 39 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step of removing tissue from a first location in a patient's body includes cutting body tissue at the first location and moving the body tissue away from the first location under the influence of suction.

Claim 40 (Previously presented). A surgical procedure to be conducted on a patient, said surgical procedure comprising the steps of removing tissue from a first location in the patient's body, separating one or more components from at least a portion of the tissue removed from the patient's body, and implanting the tissue at a second location in the patient's body after separating one or more components from at least a portion of the tissue, wherein said step of removing tissue from a first location in a patient's body includes cutting body tissue at the first location and moving the body tissue away from the first location under the influence of suction

and wherein said step of cutting body tissue includes rotating a cutting tool under the influence

of force transmitted through an elongated member which is at least partially enclosed by a

tubular member, said step of moving the body tissue away from the first location under the

influence of suction includes moving body tissue cut by the rotating cutting tool along the

tubular member under the influence of suction, wherein the elongated member is flexible such

that the cutting tool can be guided.

Claim 41 (Previously presented). A surgical procedure to be conducted on a patient, said

surgical procedure comprising the steps of removing tissue from a first location in the patient's

body, separating one or more components from at least a portion of the tissue removed from the

patient's body, and implanting the tissue at a second location in the patient's body after

separating one or more components from at least a portion of the tissue, wherein said step of

implanting the tissue at the second location includes inserting a cannula into the patient's body,

moving a surgical instrument through the cannula, removing tissue from the second location,

said step of removing tissue from the second location includes using the surgical instrument

inserted through the cannula, and, thereafter, performing said step of inserting tissue removed

from the first location in the patient's body at the second location in the patient's body.

Claim 42 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step

of separating one or more components from the removed tissue includes separating one or more

components from blood removed from the patient's body, said step of implanting the packed

tissue at a second location in the patient's body includes implanting one or more components of

the blood removed from the patient's body.

Claim 43 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step

of separating one or more components from the removed tissue includes separating at least a first

component from blood removed from the patient's body, said step of implanting the packed

tissue at a second location in the patient's body includes implanting the blood removed from the

patient's body after removing at least the first component from the blood and implanting at least

a portion of the other body tissue removed from the patient's body.

Page 3 of 11

Claim 44 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step

of separating one or more components from the removed tissue includes removing at least a first

component from the blood removed from the patient's body, and said step of implanting the

packed tissue at the second location includes implanting at least the blood from which at least the

first component has been removed.

Claim 45 (Canceled).

Claim 46 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step

of separating one or more components from the removed tissue includes filtering the blood and

other body tissue removed from the first location, said step of implanting the packed tissue at a

second location is performed after filtering the blood and other body tissue removed from the

first location.

Claim 47 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step

of separating one or more components from the removed tissue includes moving the blood and

other body tissue removed from the first location into a trap, said step of implanting the packed

tissue at a second location is performed after moving the blood and other body tissue removed

from the first location into the trap.

Claim 48 (Canceled).

Claim 49 (Previously presented). A surgical procedure as set forth in claim 36 wherein said step

of removing tissue from a first location in a patient's body includes inserting a first tubular

member into a patient's body and moving the removed tissue from the first location in the

patient's body through the first tubular member to a location outside of the patient's body, said

step of implanting the packed tissue at a second location in the patient's body includes inserting a

second tubular member into the patient's body and moving the packed tissue through the second

tubular member.

Claim 50 (Canceled).

Page 4 of 11

Claim 51 (Previously presented). A surgical procedure as set forth in claim 53 further including

the step of separating one or more components from at least a portion of the body tissue moved

through the first tubular member prior to performance of said step of moving body tissue through

the second tubular member to the second location in the patient's body.

Claim 52 (Previously presented). A surgical procedure as set forth in claim 53 further including

the step of centrifuging at least a portion of the body tissue moved through the first tubular

member to separate one or more components from the body tissue prior to performing said step

of moving the body tissue through the second tubular member.

Claim 53 (Currently Amended). A surgical procedure to be conducted on a patient, said surgical

procedure comprising the steps of inserting a first tubular member into the patient's body,

moving body tissue from a first location in the patient's body through the first tubular member to

a location a sterile trap outside of the patient's body, inserting a second tubular member into the

patient's body, and moving at least a portion of the body tissue through the second tubular

member to a second location in the patient's body, wherein a substance is added to the body

tissue after moving the body tissue from the first location through the first tubular member to a

location outside of the patient's body and prior to moving the body tissue through the second

tubular member; wherein the added substance is a bone growth promoter; and wherein the at

least a portion of the body tissue includes cells.

Claim 54 (Previously presented). A surgical procedure as set forth in claim 53 wherein said step

of moving the body tissue from the first location through the first tubular member includes

moving the body tissue through the first tubular member under the influence of suction.

Claim 55 (Previously presented). A surgical procedure as set forth in claim 53 further including

the step of cutting body tissue at the first location with a cutting tool which is driven under the

influence of force transmitted through the first tubular member.

Claim 56 (Canceled).

Page 5 of 11

Claim 57 (Previously Presented). A surgical procedure to be conducted on a patient, said surgical procedure comprising the steps of inserting a first tubular member into the patient's body, moving body tissue from a first location in the patient's body through the first tubular member to a location outside of the patient's body, inserting a second tubular member into the patient's body, and moving at least a portion of the body tissue through the second tubular member to a second location in the patient's body, wherein a substance is added to the body tissue after moving the body tissue from the first location through the first tubular member to a location outside of the patient's body and prior to moving the body tissue through the second tubular member; wherein the added substance is a bone growth promoter; and wherein said step of moving body tissue from a first location in the patient's body through the first tubular member includes moving blood from the first location in the patient's body through the first tubular member, said surgical procedure further includes separating one or more components from the blood, said step of moving body tissue through the second tubular member to the second location in the patient's body includes moving the blood from which one or more components have been removed through the second tubular member to the second location in the patient's body.

Claim 58 (Previously presented). A surgical procedure as set forth in claim 53 wherein said step of moving tissue from the first location in the patient's body through a first tubular member includes moving blood and pieces of other tissue through the first tubular member, said surgical procedure further includes filtering the blood and other tissue moved through the first tubular member, said step of moving body tissue through the second tubular member is performed after filtering the blood and other tissue.

Claim 59 (Previously presented). A surgical procedure as set forth in claim 53 wherein said step of moving tissue from the first location in the patient's body through a first tubular member includes moving blood and pieces of other tissue through the first tubular member, said surgical procedure further includes moving the blood and other tissue into a trap, said step of moving body tissue through the second tubular member is performed after moving the blood and other tissue into a trap.

Claim 60 (Previously presented). A surgical procedure to be conducted on a patient, said surgical procedure comprising the steps of inserting a first tubular member into the patient's

body, moving body tissue from a first location in the patient's body through the first tubular member to a location outside of the patient's body, packing tissue moved through the first

tubular member to form a body of packed tissue, inserting a second tubular member into the

patient's body, and moving the body of packed tissue through the second tubular member to a

second location in the patient's body.

Claim 61-68 (Canceled)

Claim 69 (Previously presented). A surgical procedure to be conducted on a patient, said

surgical procedure comprising the steps of cutting body tissue at a first location in a patient's

body, moving blood and other body tissue along a first tubular member in a direction away from

the first location in the patient's body to a location outside of the patient's body, separating one

or more components from at least one of the blood and other body tissue at a location outside of

the patient's body, thereafter, packing the blood and other body tissue to form a packed tissue

mass, moving the packed tissue mass along a second tubular member in a direction toward a

second location in the patient's body, and implanting the packed tissue mass at the second

location in the patient's body.

Claim 70 (Previously presented). A surgical procedure as set forth in claim 69 wherein said step

of separating one or more components from at least one of the blood and other body tissue

includes centrifuging the blood.

Claim 71 (Previously presented). A surgical procedure to be conducted on a patient, said

surgical procedure comprising the steps of cutting body tissue at a first location in a patient's

body, moving blood and other body tissue along a first tubular member in a direction away from

the first location in the patient's body to a location outside of the patient's body, separating one

or more components from at least one of the blood and other body tissue at a location outside of

the patient's body, thereafter, moving the blood and other body tissue along a second tubular

member in a direction toward a second location in the patient's body, and implanting the blood

and other body tissue at the second location in the patient's body wherein said step of separating

one or more components from at least one of the blood and other body tissue includes

centrifuging the other body tissue.

Page 7 of 11

Claim 72 (Previously presented). A surgical procedure as set forth in claim 71 wherein said step

of separating one or more components from at least one of the blood and other body tissue

includes centrifuging the blood.

Claim 73 (Previously presented). A surgical procedure as set forth in claim 69 further including

the step of adding a substance to the packed tissue mass prior to moving the packed tissue mass

along the second tubular member.

Claim 74 (Previously presented). A surgical procedure as set forth in claim 69 wherein said step

of moving the packed tissue mass along a first tubular member includes moving the packed

tissue mass under the influence of suction.

Claim 75 (Previously presented). A surgical procedure as set forth in claim 69 wherein said step

of cutting body tissue at the first location in a patient's body includes rotating a cutting tool

under the influence of force transmitting through the first tubular member.

Claim 76 (Previously presented). A surgical procedure as set forth in claim 69 further including

the steps of moving a surgical instrument through the second tubular member and removing the

tissue from the second location before moving the packed tissue mass along the second tubular

member.
